Hi! My name is Mahdi Rezaei, and I'm a full-stack software developer.

I specialize in using TypeScript, React, Redux, and Laravel to build software solutions for small businesses.

I have worked as a software developer for one year in the Ministry of Energy and Water. There I have been working with other groups of software developers in a stressful, fast-paced environment, so I have already learned how to manage stressful situations, remain calm, work collaboratively and behave professionally in a group.

I am currently completing the Microverse Boot Camp, a remote software development Bootcamp that allows programmers to plan and build projects together.

In my free time, I love spending time with my family and friends & reading books. I love running, and video games!

Front-End: JavaScript, TypeScript, React.js, Redux, Vue.js, Next.js.  
Back-End: Laravel, Spring Boot.  
Databases: MongoDB, MySQL.  
Tools and Methods: Git, GitHub, Netlify, Webpack, TDD, RSpec.

Looking for a developer? Let's schedule a zoom call! You can send me an e-mail at [mahdi.sohaily4030@gmail.com](mailto:mahdi.sohaily4030@gmail.com), or check out my profile at <https://github.com/MahdiSohaily>.

## Jobs

### PHP developer

#### Yadak Shop

January 2023 - April 2023

- Building web-based applications for inventory.

### Junior software developer

#### Energy Services Regulation Authority

July 2020 - December 2021
